

Emerging Nanoelectronic Devices

Aaron Alfonso

Emerging Nanoelectronic Devices

Aaron Alfonso

Venus Books
Publishers & Distributors
NEW DELHI (INDIA)

Contents

	<i>Preface</i>	<i>v</i>
1.	Introduction	1
	Conduction in Semiconducting Devices	1
	Physics of Semiconductors	5
	Semiconductor Device	12
	Conduction in Semiconductors	24
2.	Fundamentals on Nanoelectronics	29
	Unipolar Junction Devices	29
	Unijunction Transistor	30
	Unijunction Transistor Symbol and Construction	34
	Field Effect Transistors	40
	Other Unipolar Junctions	42
	UJT Relaxation Oscillator	48
3.	Advanced Material and Combinations	54
	Introduction	54
	Energy Bands in Solids	55
	Different Energy Bands of Solids	58
	Electronic Band Structure	63
	Density-functional Theory	77
4.	Devices in Nano Era	84
	Application of Semiconducting Devices	84
	Semiconductor Devices and Circuits, Applications	85
	Medical Semiconductor Market and Applications	88
	Automation	96
	Electronic Design Automation	106

5. Semiconductor Manufacturing	111
Bipolar Junction Devices	111
History	122
Bipolar Power Devices	130
6. Circuit Design in Nano Era	135
Junction Diode	135
p-n junction.....	159
Characteristics of Junction Diodes	165
P-N Junction Diode Applications	169
7. Nanoelectronic Sectors: Emerging Challenges.....	171
Sensors	171
Classification of Measurement Errors	172
Chemical Sensor	174
Biosensor.....	179
Actuator	196
Data Acquisition	201
Data Logger.....	204
Image Sensor.....	206
Machine Olfaction.....	210
Nanoelectronics	215
Nanosensor	219
Sensing Floor	224
Wireless Sensor Network	224
Special Semiconducting Devices	232
Silicon Controlled Rectifiers	233
Unijunction Transistors.....	245
Power Semiconductor Devices	261
<i>Bibliography</i>	269
<i>Index</i>	271

Index

A

Acid Interactions; 182.
Advanced Material; 54.
Aesthetics Segment; 96.

B

Band Diagrams; 83.
Band Gaps Occur; 64.
Band Structure; 63, 65, 68, 71.
Basic Concepts; 65.
Binding Proteins; 181, 187.
Binding Receptors; 182.
Biosensor System; 180.
Bipolar Junction Devices; 111.
Bipolar Transistors; 123.
Breakdown Region; 120, 183.

C

Chemical Sensor; 174, 176.
Circuit Design; 135.
Component Identifiers; 16.
Controlled Switch; 261, 268.

D

Darlington Transistors; 131.
Data Acquisition; 201, 202.
Design Automation; 106, 108.
Design Choice; 94.
Device Drivers; 203.
Diode Applications; 169.
Dynamic Performance; 264.

E

Economic Impacts; 223..
Emerging Challenges; 171.
Energy Bands; 5, 55, 57, 58, 60,
61, 62, 63.
Energy Production; 218.
Exclusion Principle; 55, 64.
Existing Examples; 221.

F

Fluid Flow; 213.
Food Analysis; 194.
Forbidden Gap; 58.
Future Directions; 205.

H

High Speed Digital Logic; 128.
Highway Systems; 103.
Home Automation; 103.
Hydraulic; 197, 200.

I

Including Quantization; 46.
Industrial Automation; 104.
Ion Channel Switch; 186.

J

Junction Diodes; 142, 165.

L

Laboratory Automation; 104.

Linear Conversion; 200.
Logarithmic Converters; 129.
Logic Gates; 156.

M

Machine Olfaction; 210.
Magnetic Fields; 79.
Manufacturing Preparation; 110.
Medical Diagnostics; 219.
Microbial Biosensors; 194.
Mott Insulators; 82.

N

Nano Era; 84, 135.
Nanomaterials Electronics; 215.

O

Ophthalmic Segment; 95.

P

Performance Metrics; 201.
Power Conversion; 155.
Predicted Applications; 219.

Q

Quantum Computers; 218.

R

Radio Demodulation; 155.
Recovery Transient; 266.
Related Devices; 154.
Relaxation Oscillator; 36, 37, 48,
248.
Reverse Bias; 144, 164, 168.

S

Sample Separation; 177.
Semiconducting Devices; 1, 84,
232.
Semiconductor Device; 12, 14, 15,
16, 85, 86, 87, 261.
Semiconductor Devices; 15, 85, 86,
87, 99, 100, 261, 268.
Sensor Network; 224, 226, 231.
Soft Actuators; 198.
Specialty Sensors; 209.
State Abstraction; 98.
Static Switches; 262, 263.
Structure Theory; 65.

T

Toxic Chemicals; 179.
Turnaround Time; 101.

U

Unijunction Transistor; 30, 31, 34,
35, 36, 37, 38, 39, 40, 245.
Unipolar Junctions; 42.

V

Vacuum Tube Diodes; 138.
Valence Band; 55, 56, 58, 71.
Video Surveillance; 102.

W

Waste Management; 103.
Waveform Clipper; 158.
Without Quantization; 46, 47.
