TABLE OF CONTENTS

1. Basics of IC Engines	
1.1 Heat Engine.....	2
1.1.1 Conventional Heat Engines and Cycles.....	6
1.2 External Combustion Engine and Internal Combustion Engine.....	9
1.2.1 Difference between Internal and External Combustion Engines.....	10
1.2.2 Challenges in Present Day Engines.....	15
1.3 I.C. Engine Constructions.....	17
1.3.1 Losses in Internal Combustion Engines.....	23
1.4 Engine Components.....	24
1.4.1 Engine Catalogue.....	27
1.5 Valve Timing Diagram.....	33
1.5.1 Intake and Exhaust Processes.....	35
1.6 Engine Classifications.....	37
2. Fuel Air Cycle and Actual Cycle	
2.1 Fuel Air Cycle.....	44
2.1.1 Composition of Working Fluid.....	44
2.2 Variation of Specific Heats.....	47
2.2.1 Dissociation effect.....	48
2.2.2 Comparison of P-V Diagram of Air-standard and Fuel - Air cycle for SI Engine.....	49
2.2.3 Otto Cycle.....	49
2.2.4 Comparison of the Otto and the Diesel Cycle.....	51
2.3 Dual Cycle (Limited Pressure Cycle).....	53
2.3.1 Steam Cycle.....	54
2.4 The Actual Cycle.....	56
2.4.1 Losses in Actual cycle.....	56
2.4.2 Effect of Throttle Opening.....	58
2.4.3 Effect of spark timing.....	59
3. SI Engines	
3.1 Theory of Carburetion.....	61
3.1.1 Functions of Carburetor.....	62
3.2 Types of Carburetor.....	65
3.2.1 Constant Jet Carburetor.....	65
3.2.2 Constant Vacuum SU Carburetor.....	68
3.3 Electronic Fuel Injection (EFI) System.....	70
3.3.1 The Fuel Delivery System.....	71
3.3.2 The Air Induction System.....	72
3.3.3 The Electronic Control System.....	72
3.3.4 Operation of Basic System.....	73
3.3.5 EFI Advantages.....	74
3.4 Combustion in Spark.....	75
3.5 Ignition Engines.....	78
3.6 Stages of Combustion.....	80
3.6.1 Ignition Lag Stage.....	80
3.6.2 Flame Propagation Stage.....	81
3.7 Flame Propagation.....	81
3.7.1 Factors Affecting the Flame Propagation.....	85
3.8 Pressure Analysis.....	88
3.8.1 Average Pressure Rise Rate.....	88
3.8.2 Instantaneous Pressure Rise Rate.....	89

4. Detonation in SI Engines	
4.1 Abnormal Combustion in SI Engines.....	92
4.1.1 Knock.....	93
4.1.2 Surface Ignition.....	95
4.2 Phenomenon of Knocking or Detonation in SI Engine.....	97
4.3 Effect of Engine Variables on Detonation.....	98
4.3.1 Temperature Factors.....	98
4.3.2 Density Factors.....	99
4.3.3 Time Factors.....	99
4.3.4 Composition.....	100
4.4 Combustion Chambers in SI Engines.....	101
4.4.1 Basic Requirements of a Good Combustion Chamber.....	102
4.4.2 Different Types of Combustion Chambers.....	104
4.5 Rating of Fuels in SI Engines.....	108
4.5.1 Octane Ratings: how to stop detonation.....	109
4.6 Fuel Additive.....	110
4.6.1 Fuel Additives Market.....	112
5. CI Engines	
5.1 Fuel Supply System.....	115
5.1.1 Fuel Flow of Engine.....	116
5.1.2 Horizontal Fuel Conditioning Module (HFCM).....	118
5.1.3 Engine Mounted Fuel Filter.....	120
5.2 Types of Fuel Pump.....	123
5.2.1 Mechanical Fuel Pump.....	123
5.2.2 Electric Fuel Pump.....	123
5.2.3 Turbo Pump.....	124
5.3 Injector and Distribution System.....	124
5.3.1 Objectives of Fuel Injection Systems.....	124
5.3.2 Classification of Injection Systems.....	125
5.3.3 Injection pump governor.....	126
5.3.4 Fuel Injector.....	126
5.3.5 Nozzle.....	127
5.4 Combustion in Compression Ignition Engines.....	129
5.4.1 Stages of Combustion in Compression Ignition Engines.....	130
5.5 Stages of Combustion.....	134
5.6 Factors Affecting Combustion.....	137
5.7 Phenomenon of Knocking in CI Engine.....	142
5.8 Effect of Knocking.....	143
5.9 Methods of Knock Control.....	145
6. Fuels in CI Engines	
6.1 Combustion Chambers.....	149
6.1.1 Types of Combustion Chambers.....	157
6.2 Different Types of Combustion Chambers.....	158
6.2.1 Indirect Injection Chambers.....	161
6.2.2 Cold Starting of CI Engines.....	167
6.3 CI Engine Fuels.....	168
6.3.1 Rating of Fuels.....	170
6.3.2 Dopes and Additives.....	170
6.3.3 Alternative Fuels for SI and CI Engines.....	171
6.4 Comparison of Knocking in SI and CI Engines.....	175
7. Testing of IC Engines	
7.1 Performance Parameters.....	178
7.1.1 Important Performance Parameters of I.C. Engines.....	179
7.1.2 Purpose of Testing an I.C. Engine.....	181
7.1.3 Some Important Terms as per ISI Standard:.....	181
7.1.4 Engine Power.....	182
7.1.5 Indicated Mean Effective Pressure (P_m).....	182
7.2 Measurement of Performance Parameters in a Laboratory.....	184

7.2.1	Measurement of Friction Power.....	184	8.	Supercharging and Turbocharging	
7.2.2	Measurement of Indicated Power.....	187	8.1	Concept of Supercharging.....	212
7.2.3	Measurement of Break Power (B.P).....	188	8.1.1	Superchargers.....	214
7.2.4	Measurement of I.P of Multi-Cylinder Engine (Morse Test).....	194	8.1.2	Benefits of using Superchargers.....	216
7.2.5	Measurement of Air-Consumption.....	195	8.1.3	Classification of Superchargers.....	217
7.2.6	Measurement of Fuel Consumption.....	197	8.2	Methods of Supercharging.....	222
7.2.7	Measurement of Heat Carried Away by Cooling Water.....	198	8.2.1	Pressure Wave Supercharger.....	223
7.2.8	Measurement of Heat Carried Away by Exhaust Gases.....	198	8.2.2	Significance and Use of Supercharging Method.....	225
7.2.9	Measurement of Exhaust Emission.....	201	8.2.3	Methods of Power Boosting.....	226
7.3	Heat Balance Sheet.....	205	8.3	Turbocharger.....	227
			8.3.1	Components of Turbocharger.....	230
			8.3.2	Advantages of Turbo Charging.....	231
			8.3.3	Turbine.....	232
			8.4	Limitations of Supercharging and Turbo charging.....	233
