VOL. 40, NO. 5

At 9:32 a.m. on July 16, 1969, NASA launches a 363-foot-tall Saturn V rocket carrying the Apollo 11 spacecraft and crew from Pad A, Launch Complex 39, at the Kennedy Space Center in Florida. On board are astronauts Neil A. Armstrong, commander; Michael Collins, command module pilot; and Edwin "Buzz" Aldrin Jr., lunar module pilot. Four days later, Armstrong would become the first human to walk on the moon.

SPECIAL SECTION

TO THE MOON AND BACK

34

The technological achievement and scientific value of Apollo 11 live on 50 years later. We reflect on that defining moment and look ahead to what's next.

36 When We Set Sail

38 Apollo, in Their Own Words

42 Apollo Milestones

44 Training the First Lunar Scientists

45 Marketing the Moon

46 Women Fight for Flight

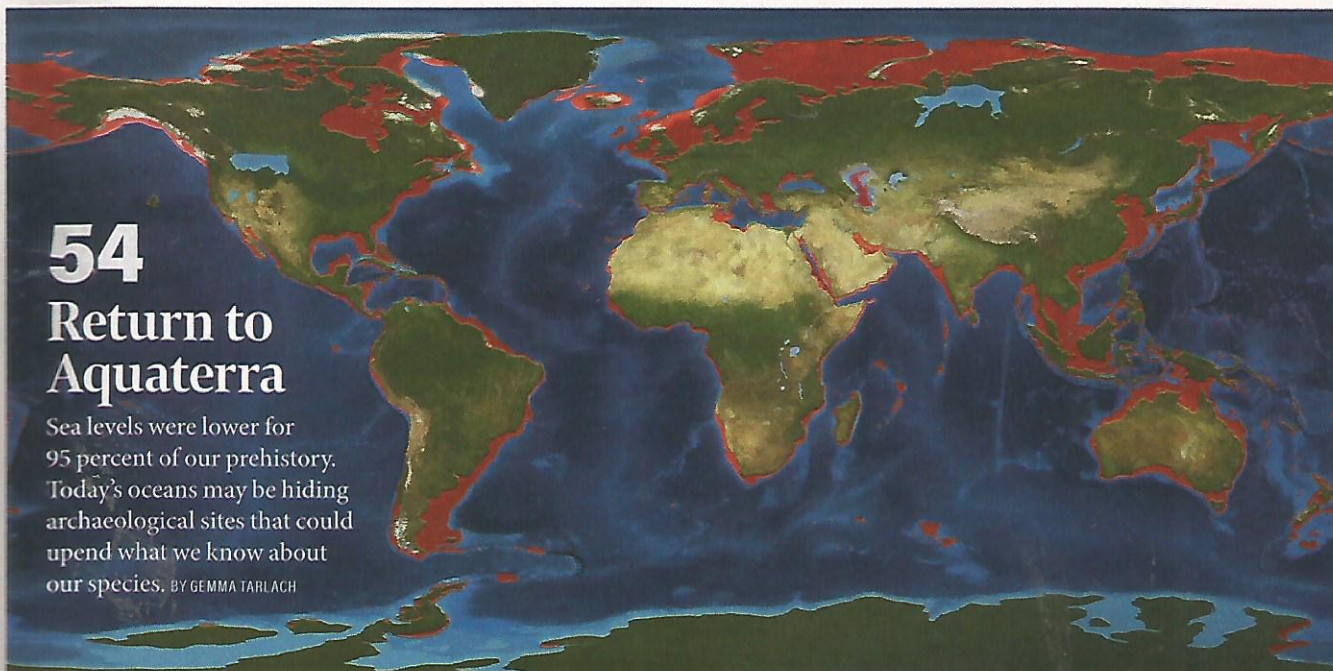

47 The Science of Apollo

48 Framing History

52 Back to the Moon

54 Return to Aquaterra

Sea levels were lower for 95 percent of our prehistory. Today's oceans may be hiding archaeological sites that could upend what we know about our species. BY GEMMA TARLACH

COLUMNS & DEPARTMENTS

6 EDITOR'S NOTE Keep Dreaming

Curiosity and the desire to explore have always been in our DNA.

9 THE CRUX

An unusual worm has a sticky solution to attacking prey; an academic dust-up over what may be the world's oldest fossils; the eerie beauty of a toxic algal bloom; the global traffic patterns of human migration; the high cost of health care; plus our top picks for your summer reading list.

22 VITAL SIGNS Connect the Dots

A woman's sudden mania, furious note-taking and other strange behaviors leave her doctors in the dark. BY ELIEZER J. STERNBERG

26 ORIGIN STORY The Real Dragonglass

More than a prop for the hit series *Game of Thrones*, obsidian plays a unique role in archaeology.

BY GEMMA TARLACH

64 MIND OVER MATTER Digital Detox

A writer discovers how dependent she is on her mobile devices — and what happens when she ditches them. BY AMY PATUREL

68 OUT THERE Protecting Mars From ... Ourselves

As human exploration of the Red Planet increases, is it time to rethink stringent rules about keeping it clean?

BY NOLA TAYLOR RED

74 20 THINGS YOU DIDN'T KNOW ABOUT... Feet

Have you heard of the International Foot? It turns 60 in July. We take its measure, and much more.

BY GEMMA TARLACH
