Unpublished Undergraduate Research, John B. Lacson Foundation Maritime University-Molo, Inc., October 2008.

Abstract

The study was conducted to determine the level of awareness on Global warming among BSCSM students at John B. Lacson Maritime University -Molo, when classified according to age, sex, monthly family income and year level. The respondents of the study were the 250 Bachelor of Science in Cruise Ship Management from first year to third year students. The researchers used the descriptive type of research and made a questionnaire which measured their level of awareness on global warming. Completion of the questionnaire was used to gather the data needed for the research. Results show that the BSCSM students as entire grouped and when grouped according to age, sex, year level and monthly family income are highly aware on global warming.
