# A TEXTBOOK OF MACHINE DRAWING

For

B.Sc./B.E. Engg., Diploma in Engg., I.T.I. (Draftsman Course),  
A.T.I., 10 + 2 System and other Engineering Examinations

According to IS: 696-1972  
(Second Revision, Third Reprint Oct., 1984)  
and SP: 46-1988)

By

**PRITAM SINGH GILL**

M.Sc. Engg. (Mechanical) Pb., M.E. (Prod. Engg.) Pb.,  
Grad. I.E. (Mech. Engg.) India, Dip. Mech. Engg. Distinction,  
M.I.E. (India), M.C.I. (India Section), M.I.S.T.E., A.M.I.A.E.

# CONTENTS

## Chapters

## Pages

- 1. Drafting Equipment ..... 1-21**  
Introduction—List of Equipment—Drawing Board—T-square—The Compass or Large Bow—Using the compass or large bow—Dividers—Use of Dividers—Bow Compasses—Use of Bow Compasses—Drop-spring bow instruments—Use of Drop-spring bow instruments—Triangles—Use of Triangles—Clinographs or Adjustable set-squares—Papers Fasteners—Erasers and erasing tools—Scales—Protractor—Drawing Pencils—Pointing the pencil—Drawing Stylus—French Curves—Drafting Machine—Preparation for Drawing—Fixing the Paper—Drawing Paper—Tracing Paper—Graph Papers—Cautions in the use of Instruments—Exercises—Questions for Viva-Voce.
- 2. Conventional Lines, Drawing Sheets-Their Layout and Planning ..... 22-39**  
Conventional Lines—Visible Outline or Object Line—Section Lines—Construction Lines—Hidden Lines—Centre lines, locus lines, extreme position of movable parts, pitch circles & parts situated in front of the cutting plane—Dimension lines, extension lines—Outlines of revolved sections—Cutting plane line—Break lines—Long Chain thick lines—Drawing Pencil Lines—Technique of Drafting—Technique of Inking a Drawing—Ideals of Neatness, Order and Accuracy—Drawing Paper—Sheet sizes and their designation—Layout of Drawing sheets—Margin—Title-block—Folding marks—Borders and Frames—Centring Marks—Grid References—Multiple sheet drawings—Additional Information—Item References—Item List—Revision Panel—Folding of Drawing Prints—Care and Storage of Original Drawings—Exercises—Questions for Viva-Voce.
- 3. Technical Lettering ..... 40-52**  
Introduction—Single Stroke Letters—Capital and Lowercase Letters—Vertical and Slant Lettering—Height of Letters—Guide Lines—Single Stroke Vertical Letters—Straight Line Letters—Curved Line Letters—Single Stroke Inclined Capital Lettering—Single Stroke Lowercase letters—Vertical Lowercase Letters—Inclined Lowercase Letters—Vertical Numerals—Inclined Numerals—Roman Letters—Composition—General Procedure for Lettering—Lettering Pencils—Lettering with Stencils—Lettering pens and their use—Exercises—Questions for Viva-Voce.
- 4. Theory of Orthographic Projections ..... 53-103**  
Introduction—Projection-terms—Orthographic Projection—Orthographic system of projections—Co-ordinate Planes of Projection—System of Orthographic Projection—First angle orthographic projection—Third angle orthographic projection—Views of Objects—Method of obtaining orthographic projections in first angle projection—Method of obtaining orthographic projections in third angle projection—View Analysis—Comparison of first and third angle projection—Orientation of the Object—Selection of the views—Laying out a three view drawing—Invisible lines and arcs—Meaning of lines—Points in Orthographic views—Normal lines in Orthographic views—Inclined lines in Orthographic views—Oblique lines in Orthographic views—Parallel lines in Orthographic views—Angle between lines in Orthographic views—Normal surfaces in Orthographic views—Inclined surfaces in Orthographic views—Oblique surfaces in Orthographic views—Treatment of Tangent surfaces in Orthographic views—Reading a drawing or blueprint reading—Identification of surfaces—Order of priority for coinciding lines—Stages in Pencilng—Exercises—Questions for Viva-Voce.
- 5. Theory of Co-ordinate Dimensioning ..... 104-132**  
Introduction—Dimensioning terms and notations—Theory of Dimensioning—Placement of Dimensions—Units of Dimensioning—Important Dimensioning Rules—Dimensioning common features—Questions for Viva-Voce.
- 6. Isometric Projection ..... 133-184**  
Introduction—Methods of Projection—Axonometric Projection—Types of Axonometric Projection—Isometric Projection—Isometric Scale—Isometric Drawing—Rectangular Construction—Use of Invisible Lines—Centre Lines—Non-isometric lines—Offset Location Measurements—Methods of Drawing an Isometric view—Angles in Isometric view—Irregular curves in Isometric Drawing—Circles in Isometric True Method—Four-centre method for drawing an approximate ellipse—Arcs of circles in Isometric—Sphere in Isometric view—Tangent circles and arcs in Isometric

view—Choice of position of Isometric axes—Isometric sections—Isometric Dimensioning—Coordinates—Representation of the system of co-ordinates—Solved Problems—Exercises—Questions for Viva-Voce.

- 7. Reading a Drawing-Missing Lines and Missing Views ..... 185-208**  
Visualization—Possible view problems—Adding a missing view or third view—Illustrative Problems—Exercises
- 8. Oblique Projection ..... 209-221**  
Introduction—Oblique Drawing—Making an oblique drawing—Shortening the measurements along Oblique axis—Angles, circles and circle arcs in Oblique Projection—Use of Reference Planes—Exercises—Questions for Viva-Voce.
- 9. Auxiliary Projections ..... 222-242**  
Introduction—Auxiliary Planes—Classification of Auxiliary Planes—Position of Auxiliary Plane—To draw an auxiliary top view or plan—Primary Auxiliary views and their classification—Secondary Auxiliary views—Important observations—Problems—Exercises—Questions for Viva-Voce.
- 10. Freehand Drafting ..... 243-267**  
Introduction—Proportion in Sketching—Materials for sketching—Types of sketches—Quality of lines—Sketching straight lines—Sketching circles, ellipses and arcs—Orthographic Projection—Axonometric Sketching—Procedure for Isometric Sketching—Sketching circles and Arcs in Isometric—Oblique Sketching—Perspective Sketching—Exercises
- 11. Sections and Conventions ..... 268-299**  
Introduction—Convention of Showing a section—Symbolic representation of a cutting plane—Types of Section—Section Lining—Conventions of Sections—Treatment of Hidden Lines—Summary of the Practices of sections—Conventional Practices—Exercises
- 12. Machining Symbols and Surface Texture ..... 300-309**  
Machining symbols—Surface Texture and its importance—Controlled surfaces—Uncontrolled surfaces—Surface Finish Characteristics—Production Procedures—Indication of Surface Roughness
- 13. Theory of Conventional Tolerancing ..... 310-340**  
Introduction—Conventional Tolerancing—Selective Assembly—Definitions Concerning tolerancing and limits system—Unilateral and Bilateral Limits—Symbols for Tolerances, Deviations and fits—Fundamental Tolerances—Fundamental Deviations—Methods of Tolerancing—General Tolerancing for linear and angular dimensions—Fits between mating parts—Definitions concerning fits—Systems of fits—Classification of fits—Guide for selection of fits
- 14. Geometric Dimensioning and Tolerancing ..... 341-423**  
Introduction—Geometric Dimensioning and Tolerancing—When to use geometric tolerancing—Shortcomings of coordinate tolerancing—Advantaes of Geometric Dimensioning & Tolerancing—Gauging and Measuring Principles—Fundamentals rules of dimensioning and tolerancing—Linear dimensions without datums—Location dimensions with datum—Assumed Datums—Purpose of Dimensions—Types of Dimensions—Principles of functional dimensioning—Cost of poor dimensioning—Application of geometric tolerancing—Steps for applying geometric tolerances—Balanced design—General definitions—Applicability of material conditions—Feature control frame—Geometric dimensioning and tolerancing rules—Virtual/resultant condition, inner and outer boundary—Bonus Tolerance—Related Characteristics—Procedure for positioning remarks that are related to tolerance—Toleranced features—Tolerance zones—Datums and Datum system—Datum target, their symbols and indication—Feature of size datum specifications—FOS datum feature referenced at MMC—Datum sequence—Restrictive Specifications—Theoretically exact dimensions—Interpretations—Cylindricity
- 15. Detail & Assembly Drawing—Wooden Joints ..... 424-432**  
Introduction—Working Drawings—Set of working drawings—Detail Drawings—One view Drawings—Assembly Drawings—Wooden Joints—Exercises—Questions for Viva-Voce.

- 16. Rivets and Riveted Joints** ..... 433-442  
Fasteners—Classification of Fasteners—Rivets—Riveted Joints—Shapes of rivet heads—Rivet diameters—Riveting—Rivet Testing—Caulking and Fullering—Definitions—Types of Riveted Joints—Thickness of cover plates—Chain and Zig-Zag Riveting—Boiler Joints—Conventional representation of holes, bolts and rivets—Exercises—Questions for Viva-Voce.
- 17. Welds and Welded Joints** ..... 443-453  
Welding—Types of Welded Joints—Elementary welding symbols—Position of the symbols on Drawings—Dimensioning of welds—Weld contours—Surface contour and finish of welds—Weld all round—Site weld—Method of welding—Compound weld—Projection weld—Exercises—Questions for Viva-Voce.
- 18. Screw Threads and Threaded Fasteners** ..... 454-492  
Introduction—Helix—Thread terms and nomenclature—Thread Designation—Threads for power transmission—Different thread profiles—Threads for Fastening—V-Threads—Actual, Detailed, conventional and simplified representation of screw threads—Threads in section—Tapped holes—Threaded Fasteners—Washer—Bolts—Through bolt—Tap bolt—Stud or stud bolt—Set screws—Cap screws—Machine screws—Locking arrangements—Foundation bolts—Method of dimensioning screw threads—Exercises—Questions for Viva-Voce.
- 19. Keys, Cotters and Joints** ..... 493-506  
Keys—Classification of Keys—Heavy Duty Keys—Light Duty Keys—Tangential Keying—Comparison between keys and cotters—Cottered joints—Pin Joint—Knuckle joint—Exercises—Questions for Viva-Voce.
- 20. Shaft Couplings** ..... 507-520  
Introduction—Classification of Couplings—Rigid couplings—Rigid Flange Couplings—Muff couplings—Flexible or non-rigid couplings—Pin type flexible coupling—Compression couplings—Oldham's Coupling—Clutches—Conical friction clutch—Claw clutch or claw coupling—Hooke's joint or Universal coupling—Exercises.
- 21. Pipe Joints and Fittings** ..... 521-529  
Introduction—Standardization—Types of Pipe—Pipe joints—Screwed Joint—Welded joints—Cementing—Flange Joints—Spigot and socket joints—Hydraulic pipe joint—Screwed and Flanged Union (Union Joint)—Pipe Fittings—Valves—Piping Drawings—Dimensioning—Sizes of Standard Pipe—Exercises.
- 22. Pulleys** ..... 530-535  
Introduction—Solid cast iron pulleys—Split pulley—Built-up Pulley—Fast and Loose Pulleys—Stepped pulleys or speed cone pulleys—Rope and V-Belt Pulleys—Exercises—Questions for Viva-Voce.
- 23. Bearings, Hangers and Brackets** ..... 536-564  
Introduction—Types of Bearings—Solid Journal Bearing—Bushed Bearing—Open Bearing—Plummer Block or Pedestal Bearing—Prevention of Rotation of Brasses—Pivot or Foot-Step Bearing—Split Type Foot-Step Bearing—Angle Plummer Block—Swivel Bearing—Self-Aligning Bearing—Hangers—Well Bracket—Combined well bracket and bearing—Ball and Roller Bearings—Ball Bearings—Roller Bearings—Exercises.
- 24. Valves and Cocks** ..... 565-586  
Introduction—Valves and valve seats—Classification of valves—Some common features of valves—Junction or stop valve—Non-return valve—Blow-off cock—Safety valves—Lever Safety Valve—Spring loaded safety valve—Cylinder relief valve—Three-way stop valve—Questions for Viva-Voce.
- 25. Steam Engine Parts** ..... 587-605  
Introduction—Steam Engine Pistons—Stuffing Box—Packing materials for use in stuffing boxes—Crosshead—Locomotive crosshead—Crosshead with detachable shoe—Connecting rod—Connecting rod big end—Locomotive connecting rod end—Marine engine connecting rod end—Eccentric—Questions for Viva-Voce.

- 26. Cams** ..... 606-624  
Introduction—Types of cam—Definitions—Types of Follower—To construct the follower displacement diagrams or cam graphs for given cam profiles—To construct the cam profile for a given follower motion sequence—Cylindrical cams—Problems—Exercises.
- 27. Toothed Gears** ..... 625-645  
Friction driving—Toothed gears—Classification of Toothed gears—Spur Gears—Tooth Profiles—Curves used for the profiles of teeth—Involute—Spur gear nomenclature—Gear calculation—Construction of base circles—Construction for approximate involute—Approximate constructions for the involute tooth profile—Internal gears—Involute racks—Bevel wheels or gears—Terms used in Bavel Gearing—Usual calculations for Bavel Wheels—Approximate Construction for Involute Bevel Gear Teeth—Conventional Representation of Gears.
- 28. Automotive Parts** ..... 646-662  
Introduction—Piston—Connecting rod—Fuel Pump and Atomizer—Spark Plug—Carburator Body—Rotary Gear Pump—Friction clutches.
- 29. Miscellaneous Machine Parts** ..... 663-709  
Lathe Tail Stock or Loose Head Stock—Four-Jaw Chuck—Tool Post—Tool Holder—Lathe Slide Rest—Screw Jack—Tool Head of a shaping machine—Vices—Pipe Vice—Machine Swivel Vice—Bench Vice—Jigs and Fixtures—Bracket and Gland—Worm and Wheel Gearbox—Shaft Bracket—Work reduction gearbox—Ram Pump—Force Pump—Quick change drill holder—Measuring Stand—Hand Drill—Water Circulating Pump.
