MACHINE DRAWING

[A TEXT BOOK FOR DEGREE, DIPLOMA, I.E.T.E., A.M.I.E., AND
VARIOUS BRANCHES OF ENGINEERING]

CONTENTS

<i>Chapters</i>	<i>Pages</i>	<i>Chapters</i>	<i>Pages</i>
1. ENGINEERING DRAWINGS AND STANDARDIZATION	1-4	3.8. Drawing Sheets	19
1.1. Engineering Drawing	1	3.9. Pencils	20
1.2. Field of Application	1	3.10. Drawing Stylus or Mechanical Pencil	21
1.3. Drawing Made to Standard	1	3.11. Securing the Paper	21
1.4. Principles of Drawings	1	3.12. Drawing Horizontal Parallel Lines	22
1.5. Types of Drawings	2	3.13. Drawing Vertical Lines	22
1.5.1. Single Part Drawing	2	3.14. Set-Squares or Triangles	22
1.5.2. Assembly Drawing	2	3.15. Protractor	23
1.5.3. Drawings of Similar Parts (collective drawings)	3	3.16. Scales	23
1.5.4. Collective Assembly Drawing	3	3.17. Use of Scale	23
1.5.5. Combined Drawings	3	3.18. Mini-Drafter	24
1.6. Who Needs Engineering Drawings	4	3.19. Set of Drawing Instruments	24
2. FREEHAND SKETCHING	5-16	3.20. Compass	25
2.1. Drafting Methods	5	3.21. Bow Compass	25
2.2. Requirement of Freehand Sketching	5	3.22. Dividers	26
2.3. Sketching Material	5	3.23. French Curves	27
2.4. Engineering Use of Sketches	6	3.24. Splines	27
2.5. Basic Primitives	6	3.25. Erasing	27
2.6. Characteristics of Freehand Lines	6	3.26. Pens and Ink	27
2.7. To Sketch Straight Lines	6	3.27. Templates	28
2.8. To Sketch Arcs Connecting Straight Lines	7	3.28. Other Instruments and Equipment	28
2.9. To Sketch Arcs Connecting Straight and Curved Lines	7	Objective Questions	29
2.10. Sketching Circles and Ellipses	7	Exercise	30
2.11. Pictorial Drawings	8	4. SIZES, LAYOUT AND FOLDING OF DRAWING SHEETS	31-41
2.12. Orthographic Sketches	8	4.1. Scope of Application	31
2.13. Lines for Sketches	10	4.2. Sizes	31
2.14. Oblique Sketching	10	4.3. Graphical Features	31
2.15. Sketching Circles in Oblique	11	4.4. Designation	34
2.16. Right and Left Oblique Sketches	11	4.5. Folding of Drawing Prints	35
2.17. Foreshortening	12	4.6. Typical Layout of Title Blocks	38
2.18. Isometric Sketching	12	4.7. Title Block for Schools and Colleges	40
2.19. Making a Simple Isometric Sketch	12	Objective Questions	40
2.20. Sketching Circles and Arcs in Isometric	12	Exercise	41
2.21. Perspective Sketching	13	5. ITEM REFERENCES AND ITEM LISTS IN TECHNICAL DRAWINGS	42-45
2.22. Single Point OR Parallel Perspective	13	5.1. Scope and field of application	42
2.23. Angular or Two-Point Perspective	14	5.2. General requirements	42
2.24. Sketching Circles and Arcs in Perspective	14	5.3. Presentation	42
Objective Questions	15	5.4. Example	43
Exercise	16	5.5. Introduction	44
3. DRAWING INSTRUMENTS, THEIR USES AND CARE	17-30	5.6. Scope and field of application	44
3.1. General	17	5.7. General requirements	44
3.2. Drawing Instruments and Equipment	17	5.8. Layout	44
3.3. Drawing Board	18	5.9. Entries	45
3.4. Drawing Board Sizes	18	6. LINES AND LETTERING	46-64
3.5. Tee-Square	19	6.1. Introduction	46
3.6. Tee-Square Sizes	19	6.2. Lines	46
3.7. Drawing Trestle	19	6.2.1. Types of Lines	46
		6.3. lettering	48
		6.4. General Requirements	49
		6.5. Dimensions	49

<i>Chapters</i>	<i>Pages</i>	<i>Chapters</i>	<i>Pages</i>
6.6. Designation	53	9.24. Movable parts	107
6.7. Examples	53	9.25. Finished parts and blanks	108
6.8. Name of particular types of letters	58	9.26. Parts made from separate, equal elements	108
Objective Questions	64	9.27. Surface pattern	108
Exercise	64	9.28. Fibre and rolled directions	108
7. DIMENSIONING ON TECHNICAL DRAWINGS	65-79	9.29. Parts with two or more identical views	109
7.1. Introduction	65	9.30. Mirror-image parts	109
7.2. Theory of Dimensioning	65	9.31. Types of surfaces and their identification	109
7.3. Scope and Field of Application	66	Objective Questions	123
7.4. General Principles	66	Exercise	130
7.5. Method of Dimensioning	67	10. SECTIONS AND CONVENTIONS	142-199
7.6. Arrangement and Indication of Dimensions	71	10.1. Scope and Field of Application	142
7.7. Special Indications	73	10.2. Introduction	142
7.8. Indication of Levels	76	10.3. Conventional Representation of Materials	142
Objective Questions	78	10.4. Conventional Breaks	142
8. SCALES	80-94	10.5. Terms and definitions	144
8.1. Scope and field of application	80	10.6. General	144
8.2. Definitions	80	10.7. Sections revolved in the relevant view	145
8.3. Designation	80	10.8. Cuts/sections of symmetrical parts	145
8.4. Inscription	80	10.9. Local cuts/sections	145
8.5. Scales	80	10.10. Sizes of Cut or Section Arrows	145
8.6. Large Scale Drawings	81	10.11. General Principles	145
8.7. Representative Fraction	81	10.12. Removed sections	147
8.8. Unconventional Scales	81	10.13. Other sections	147
8.9. Types of Scales	82	10.14. Arrangement of successive sections	148
8.10. Plain Scales	82	10.15. Basic conventions for representing areas on cuts and sections	149
8.12. Diagonal Scales	85	10.16. Hatching	149
8.13. Comparative Scales	89	10.17. Shading or toning	150
8.14. Vernier Scales	90	10.18. Extra-Thick continuous outlines	150
8.15. Scale of Chords	91	10.19. Thin sections	150
Objective Questions	92	10.20. Thin adjacent sections	150
Exercise	93	10.21. Specific materials	150
9. ORTHOGRAPHIC PROJECTION	95-141	10.22. Sections of Standard Parts (Shafts, Keys, Cotters, Bolts, Rivets, etc).	150
9.1. Introduction	95	10.23. Sections of reinforcement Ribs and Webs	151
9.2. General principles	95	10.24. Revolution of Ribs, Arms, Holes And Their Conventional Sections	152
9.3. Auxiliary Planes of Projection	97	Objective Questions	178
9.4. Scope of Application	99	Exercise	179
9.5. General Principles	99	11. AUXILIARY VIEWS	200-221
9.6. Designation of views	99	11.1. Introduction	200
9.7. Methods of representation	99	11.2. Auxiliary View Projected from the Top View	200
9.8. Terms and definitions	102	11.3. Auxiliary View Projected from the Front View	201
9.9. Choice of views	102	11.4. To Plot Curves in Auxiliary View	204
9.10. Partial views	103	11.5. To Plot Curves From An Auxiliary View	204
9.11. Special positions of view	103	11.6. Secondary Auxiliary View	205
9.12. Types of lines and their application	104	Objective Questions	206
9.13. Local views	104	Exercise	207
9.14. Adjacent parts and contours	104	12. INTERPRETATION OF VIEWS (MISSING VIEWS)	222-251
9.15. Intersections	105	12.1. Introduction	222
9.16. Square ends on shafts	106	12.2. Reading of Orthographic Views (Blue-print Reading)	222
9.17. Interrupted views	106	Exercise	228
9.18. Repeated features	106		
9.19. Enlarged features	106		
9.20. Initial outlines	107		
9.21. Bend lines	107		
9.22. Slight inclines or curves	107		
9.23. Transparent objects	107		

<i>Chapters</i>	<i>Pages</i>	<i>Chapters</i>	<i>Pages</i>
13. ISOMETRIC PROJECTION	252-285	16.7. Indication of the components of an angular dimension	325
13.1. Pictorial Drawings	252	16.8. Indication of the Components of Conical Dimension	325
13.2. Divisions of Pictorial Projection	252	16.9. Definition	325
13.3. Axonometric Projection	253	16.10. Graphical symbol for a cone	326
13.4. Divisions of Axonometric Projections	253	16.11. Dimensioning of cones	326
13.5. Isometric Position	254	16.12. Tolerancing of cones	327
13.6. Isometric Projection	254		
13.7. Isometric Axes and Isometric Planes	255	17. GEOMETRICAL TOLERANCING - TOLERANCING OF FORM, ORIENTATION, LOCATION AND RUN OUT GENERALITIES, DEFINITIONS, SYMBOLS, INDICATIONS ON DRAWINGS	330-352
13.8. Isometric Scale	255	17.1. Scope and Field of Application	330
13.9. Construction of Graphical Scale	256	17.2. General	330
13.10. Isometric Drawing or Isometric View	256	17.3. Symbols	332
13.11. Sphere in Isometric	256	17.4. Tolerance Frame	333
13.12. Methods for Drawing Isometric Views	257	17.5. Toleranced Features	334
13.13. To Construct an Approximate Four-centre Ellipse in Isometric	259	17.6. Tolerance Zones	334
13.14. To Construct an Ellipse (Where Circle is a Section of Sphere) in Isometric	260	17.7. Datums	336
13.15. To Construct Semicircles in Isometric	260	17.8. Restrictive Specifications	337
13.16. To Construct Radii in Isometric	261	17.9. Theoretically Exact Dimensions	338
Objective Questions	272	17.10. Projected Tolerance Zone	338
Exercise	274	17.11. Maximum Material Condition	339
14. MACHINE DRAWING	286-297	17.12. Definitions of Tolerances	339
14.1. Introduction	286	17.13. Detailed Definitions of Tolerances	340
14.2. Classification of Machine Drawing	286		
14.3. Some Important Features in Machine Drawing	288	18. DATUM-SYSTEMS FOR GEOMETRICAL TOLERANCES	353-365
14.4. Abbreviations	291	18.1. Introduction	353
14.5. Conventional Representations of Common Features	291	18.2. Scope and field of application	353
15. LIMITS AND FITS	298-322	18.3. Definitions	353
15.1. Introduction	298	18.4. Establishing datums	353
15.2. Field of application	298	18.5. Application of datums	355
15.3. Terms of definitions	298	18.6. Indication of datums and datum-systems	357
15.4. Symbols, designation and interpretation of tolerances, deviations and fits	304	18.7. Datum targets	359
15.4.1. Symbols	304	18.8. Three-plane datum-system	364
15.4.2. Designation	304	18.9. Groups of features nominated as datums	365
15.4.3. Interpretation of a Toleranced Size	305	19. SURFACE TEXTURE	366-388
15.5. Graphical representation	307	19.1. The need for control of surface texture	366
15.6. Reference temperature	308	19.2. Geometry of Surfaces	366
15.7. Standard tolerances for basic sizes up to 3 150 mm	308	19.3. Terminology	367
15.8. Fundamental deviations for basic sizes up to 3 150 mm	308	19.4. Scope	370
		19.5. Basic Graphical Symbols	370
		19.6. Graphical symbols for the indication of surface texture	370
16. TOLERANCING OF LINEAR, ANGULAR AND CONE DIMENSIONS	323-329	19.7. Composition of complete graphical symbol for surface texture	372
16.1. Introduction	323	19.8. Indication of surface texture parameters	373
16.2. Scope and field of application	323	19.9. Indication of manufacturing method or related information	376
16.3. Units	323	19.10. Indication of the surface lay	376
16.4. Indication of the components of a linear dimension	323	19.11. Indication of machining allowance	378
16.5. Order of indication of deviations and limits of size	324	19.12. Summarizing of indications of surface texture requirements and their values	378
16.6. Indication of tolerances on drawings of assembled parts	324	19.13. Position on drawings and other technical product documentation	378

Chapters	Pages	Chapters	Pages
20. CYLINDRICAL SCREW THREADS	389-418	22.9. Terms and Definitions	453
20.1. Introduction	389	22.10. Proportions for Drawing Purpose	458
20.2. Use of Screw Threads	389	22.11. Simplified Representation of Fasteners	458
20.3. Geometrical and general terms	389	Objective Questions	461
20.4. Screw thread	390	Exercise	462
20.5. Terms relating to screw thread elements	391	23. WELDING	463 - 480
20.6. Forms of Screw Threads	394	23.1. Introduction	463
20.7. Triangular or V-threads	394	23.2. Welding	463
20.8. Square Thread Profile	398	23.3. Welding Chart	463
20.9. ACME Thread Profile	398	23.4. Welding Processes	464
20.10. Knuckle Thread Profile	399	23.5. Advantages of Welding Over Riveting	464
20.11. ISO Metric Trapezoidal Screw Thread Profile	400	23.6. Welded Joints	464
20.12. Buttress Thread Profile	400	23.7. Welded Structures and Symbols	465
20.13. Saw Tooth Thread Profile	401	23.8. Welded, Brazed and Soldered Joints - Symbolic Representation on Drawings	465
20.14. Conventional Representation of Threaded Parts	408	23.9. General	465
20.15. Hidden screw threads	411	23.10. Symbols	465
20.16. Sections of threaded parts	411	23.11. Position of the Symbols on Drawings	469
20.17. End view of screw threads	411	23.12. Dimensioning of Welds	470
20.18. Limits of useful length of screw threads	411	23.13. Complementary Indications	474
20.19. Incomplete threads (run-outs)	411	23.14. Examples for Application of Spot and Seam Joints	474
20.20. Assembled threaded parts	411	23.15. Guidance for Converting Drawings made in Old System into the new system	476
20.21. Convention for Other Threads (Except V-threads)	413	23.16. Symbols and Applications	476
20.22. Indication and Dimensioning of Threaded Parts	413	Objective Questions	480
Objective Questions	414	24. WOODEN JOINTS (DETAIL AND ASSEMBLY DRAWINGS)	481 - 486
21. SCREWED FASTENINGS	419-447	24.1. Detail Drawings (Working Drawings)	481
21.1. Introduction	419	24.2. Assembly Drawings	482
21.2. Bolted Joint	419	24.3. Wooden Joints	483
21.3. Bolt Terminology	420	24.4. Classification of Wooden Joints	483
21.4. Specifications for Bolts and Nuts	420	24.5. Exercise	483
21.5. Types of Nuts	421	Objective Questions	486
21.6. Washers	421	25. COTTERED AND OTHER JOINTS	487 - 502
21.7. Types of Nuts for Special Purposes	425	25.1. Cotter	487
21.8. Forms of Bolt	428	25.2. Gib	488
21.9. Prevention of Rotation of Bolt Heads	431	25.3. Cotter Joint	488
21.10. Screws	435	25.4. Types of Cottered Joints	489
21.11. Ends of Drilled Holes and Screwed Pieces.	436	25.5. Other Joints	489
21.12. Studs	437	25.6. Sleeve and Cotter Joint for Round Rods	490
21.13. Difference between Bolted, Studded, Tap Bolt and Screwed Joint	438	25.7. Socket and Spigot Cotter Joint for Round Rods	490
21.14. Foundation Bolts	440	25.8. Gib and Cotter Joint for Square Rods	490
21.15. Locking Devices for Nuts	441	25.9. Knuckle Joint (Pin Joint)	491
Objective Questions	446	25.10. Adjustable Joint for Round Rods (Tie Rods)	491
Exercise	447	25.11. Turn Buckle	491
22. RIVETS AND RIVETED JOINTS	448 - 462	25.12. Exercise	491
22.1. Rivet	448	Objective Questions	501
22.2. Rivet Holes	448	26. KEYS	503 - 510
22.3. Riveting	449	26.1. Introduction	503
22.4. Caulking and Fullering	450	26.2. Key and Keyway	503
22.5. Testing the Rivet	450	26.3. Types of Keys	503
22.6. Loading Condition of Rivet	450	26.4. Notes on Sunk Keys	504
22.7. Standard Rivet Heads	450		
22.8. Riveted Joints	453		

Chapters	Pages	Chapters	Pages
26.5. Notes on Non-sunk Keys	509	30.18. Dimensioning and Special Rules	591
26.6. Tangent Keys	509	30.19. Graphical Symbols	592
Objective Questions	510	30.20. Examples	593
Exercise	510	30.21. Simplified Representation of Pipelines	596
27. SHAFTS COUPLINGS	511 - 533	31. VALVES	598 - 622
27.1. Introduction	511	31.1. Introduction	598
27.2. Kinds of Shaft Couplings	511	31.2. Classification of Valves	598
27.3. Rigid Couplings	511	31.3. Shapes of Valve Body	600
27.4. Muff Couplings	511	31.4. Stop Valves and Junction Valves	601
27.5. Flange Couplings	515	31.5. Safety Valves For Boilers	607
27.6. Compression Coupling	521	31.6. Blow-off Cock	611
27.7. Flexible Coupling	524	Objective Questions	621
27.8. Universal Coupling or Hooke's Joint	525	32. STEAM ENGINE DETAILS	623 - 644
27.9. Oldham's Coupling	529	32.1. Introduction	623
27.10. Friction Clutch	530	32.2. Pistons	624
27.11. Claw Coupling or Clutch	531	32.3. Stuffing Boxes	625
Objective Questions	532	32.4. Cross Heads	626
28. BEARINGS AND BRACKETS	534 - 566	32.5. Connecting Rod Ends	636
28.1. Bearing	534	32.6. Eccentrics	641
28.2. Classification	534	33. JIGS AND FIXTURES	645 - 681
28.3. Further Notes on Bearings	537	33.1. Introduction	645
28.4. Bearing Metals	537	33.2. Jigs	645
28.5. Simple Journal Bearings	537	33.3. Fixtures	645
28.6. Bushed Bearing	538	33.4. The Design of Jigs and Fixtures	645
28.7. Open Bearing	540	33.5. Principles of Jig and Fixture Design	645
28.8. Bracket Bearings	542	33.6. Construction Methods and Materials Used	646
28.9. Plumber Blocks or Pedestal Bearings	544	33.7. Drill Bushes	646
28.10. Prevention of Rotation or Brasses	551	33.8. Location and Clamping	648
28.11. Adjustable Swivel Bearing	554	33.9. Clamping Devices	651
28.12. Footstep Bearing (Suitable for Supporting Vertical Shaft)	556	33.10. Materials used in Jig and Fixture Construction	655
28.13. Brackets	559	33.11. Drill Jig types	655
Objective Questions	565	33.12. Turning, Grinding and Milling Fixtures	661
29. PULLEYS	567 - 576	33.13. Types of Milling Fixture	663
29.1. Introduction	567	34. CAMS	682 - 690
29.2. Solid Cast Iron Pulleys	567	34.1. Cams	682
29.3. Crowning	567	34.2. Layout of Cam Shape	682
29.4. Fast and Loose Pulleys	567	34.3. Displacement Diagram	684
29.5. Split Pulleys	567	34.4. Kinds of Motion	685
29.6. Built-up Pulleys	568	35. GEARS	693 - 712
29.7. Stepped Pulleys or Speed Cone Pulleys	568	35.1. Gears	693
29.8. Exercises	568	35.2. Types of Gears	693
Objective Questions	576	35.3. Spur Gears	693
30. PIPE JOINTS AND PIPE LINES	577 - 597	35.4. Spur Gear Definitions and Formulae	694
30.1. Introduction	577	35.5. The Shape of the Tooth Profiles	697
30.2. Pipe Materials and Applications	577	35.6. Approximate Construction of Involute Teeth	697
30.3. Pipe Designation	577	35.7. Conventional Representations of Gears	699
30.4. Pipe Joints	577	35.7.1. Detail Drawings (Individual Gears)	699
30.5. Joints for Cast-Iron Pipes	577	35.7.2. Assembly Drawings (Gear Pairs)	701
30.6. Union Joint	582	35.8. Working Drawing of Toothed Gears	704
30.7. Simplified Representation of Pipelines	584	35.8.1. Spur Gear	704
30.7.1. Definitions	584	35.8.2. Helical Gear	705
30.7.2. General Principles	584	35.8.3. Bevel Gears	706
30.8. Representation of Pipes, etc.	584	35.8.4. Worm and Worm Wheel	708
30.9. Scale	584	35.9. Drawings of Toothed Gearing	710
30.10. Lines	584	35.9.1. Spur Gearing	710
30.11. Lettering	585	35.10. Helical Gearing	711
30.12. Dimensioning	585	35.11. Bevel Gearing	711
30.13. Tolerances	587	36. MISCELLANEOUS MACHINE PARTS	713 - 736
30.14. Crossings and Connections	587		
30.15. Representation of Equipment	587		
30.16. Examples	589		
30.17. Deviations from the direction of coordinate axes	589
