#### Abstract

The purpose of this study is to determine the level of perception of the students of JBLCF when classified according to: a. Instruction; b. Classroom Management; c. Evaluation; and d. Personal and Social Quantities, for the academic year 2003-2004. The data for this descriptive research was gathered through the use of questionnaire. The participants of the study were marine engineering students. To statistically analyze the data, the means and percentage was employed as descriptive statistics.
