"Perception of Training for Global Competitiveness Among Seafarers at Municipality of San Miguel, Iloilo." Unpublished Undergraduate Research, John B. Lacson Colleges Foundation Molo-Inc., May 2006.

Abstract

The purpose of this study was to determine the level of training for global competitiveness among seafarers of the Municipality of San Miguel, Iloilo. The data of this descriptive research were gathered using the data-gathering instrument entitled "Training for Global Competitiveness Rating Scale" modified by the researchers. The respondents of this study were the 60 randomly selected seafarers at the Municipality of San Miguel, Iloilo. Descriptive statistics employed were the mean, frequency count, and percentage. No inferential statistics used in this study. The findings revealed that the perception of seafarers at the Municipality of San Miguel, Iloilo of training for global competitiveness was "highly effective". Seafarers who were classified as management, operational, and rating
