PRACTICAL RESEARCH

for Senior High School

2

Helen E. Caintic, Ph.D.

C & E Publishing, Inc.
2021

Table of Contents

Preface	vii
UNIT 1 Introduction to Research	1
Chapter 1 The Nature of Inquiry and Research.....	3
Quantitative Research	7
The Importance of Quantitative Research Across Fields.....	13
Kinds of Variables and Their Uses	17
Chapter 2 Identifying the Inquiry and Stating the Problem.....	27
Stating a Research Question	32
Stating the Scope and Delimitations of the Study and Significance of the Study.....	36
UNIT 2 Planning a Research Investigation	43
Chapter 3 Learning from Others and Reviewing Related Literature.....	44
Selection of a Relevant Literature	44
Writing the Review of Related Literature	48
Chapter 4 Formulating a Research Design	59
Research Design.....	59
Types of Quantitative Research Designs	62
Constructing an Instrument and Establishing its Validity and Reliability	73
Planning Data Collection and Analysis	80
Presenting Research Methodology.....	102

UNIT 3	Data Collection, Analysis, and Writing a Research Paper	111
Chapter 5	Finding Answers Through Data Collection, Organization, and Analysis.....	113
	Data Collection, Organization, and Analysis	113
	Statistical Tests Used in Experimental Research	114
Chapter 6	Reporting and Sharing Findings	137
	Drawing Conclusions and Writing a Research Report	137
Appendices		149
A.	Abstract	149
B.	Review of Related Literature and Conceptual Framework.....	151
C.	Checklist for Evaluating a Research Paper.....	157
D.	Scoring Guideline for Oral Presentation of a Research Paper.....	160
E.	Areas under the Normal Curve	162
F.	Critical Values of t	164
G.	Critical Values of the Chi-Square	165
H.	Critical Values of the F Distribution ($\alpha = .01$).....	166
I.	Critical Values of the F Distribution ($\alpha = .05$).....	167
J.	Critical Values of the r for the Sign Test	168
K.	Random Digits.....	169
L.	A Sample Project Proposal.....	172
Glossary		177
Bibliography		180
Index		182

Index

A

- Abstract, 140, 141
- Analytical Survey, 81
- Appendix, 145
- Applied research, 6
- Array, 86

B

- Background of the study, 31, 141
- Baseline phase, 66
- Basic research, 6
- Bibliography, *see* Works Cited
- Bimodal distributions, 95
- Blocks, 65

C

- Causal-comparative research, 11-12
- Choice of a Subject for Investigation, 61-62
- Citing Related Literature, 46
- Cluster Sampling, 69
- Conceptual Framework, 51, 55
- Control Group, 18
- Control of Extraneous Variable, 61
- Convenience Sampling, 70
- Correlational research, 12, 72
- Cronbach alpha, 77

D

- Data Analysis and Hypothesis Testing, 90
- Descriptive Survey, 71, 81

E

- Equivalent Time-Samples Design, 73
- Exclusive range, 96
- Experimental group, 18

Experimental method, 81, 83

Experimental research, 12

Experimental research design, 63

 completely randomized design, 64-65

 factorial design, 64

 post-test only design, 63

 pre-test/post-test design, 63

 randomized complete block design, 65-66

 repeated measures design, 63

G

Grouped frequency distribution, 87-88

 class intervals, 87

 class size, 88

H

Hypothesis, 35-36, 99

 alternative, 35, 99

 cause and effect statement, 35

 null, 35, 100

Hypothesis testing, 99-102

 acceptance region, 101

 critical region, 101

 test of significance, 100

I

Inclusive range, 96

Inquiry, 3

Interval Scale, 20

Intervention phase, 66

L

List of References, 138

see also Works Cited

Local Control, 61

M

Measures of Central Tendency, 90-95

mean, 90-92

median, 93

mode, 95

Measures of Variability, 95-99

mean deviation, 96

range, 95-96

standard deviation, 98-99

variance, 97-98

Methodology/Materials and Methods, 142-143

Multistage Sampling, 69-70

N

Naturalistic Comparison Studies, 72

Nominal data, 84

Nominal Scale, 19-20

Non-experimental Research Design, 71-73

Non-Parametric Tests and Statistical Methods, 126

chi-square test, 126-128

Friedman test for a randomized

block design, 130-131

sign test, 129

O

Objectives of the Study, 33

Observation Procedures, 62

Observational Method, 83

Operational Definition of Terms, 53

Ordinal Data, 84

Ordinal Scale, 20

Organizing and Presenting of Data, 83-88

organization and presentation of discrete data,
84-86

organization and presentation of interval or ratio
data, 86-88

P

Parametric Statistics, 114-126

correlational analysis, 124-126

one-sample hypothesis of means, 115-117

three or more sample hypothesis tests of means,
121-124

two-sample hypothesis of means, 117-120

Planning Data Collection and Analysis, 80-88

organizing and presenting of data, 83-88

planning data analysis, 82-83

steps in obtaining data through the experimental
method, 81-82

Primary data, 113

Properties of Measurement Tools, 76

Q

Qualitative Research, 6

Quantitative Research, 6, 7-15

characteristics, 8-9

importance across fields, 13-15

kinds, 11-12

strengths, 9-10

weaknesses, 10-11

Quasi-experimental designs, 72-73

Quasi-experimental research, 12

Questionnaire, 73-76

common mistakes in writing, 75-76

components, 76

formats, 74-75

steps in writing, 73-74

R

Randomization, 60-61

Ratio Scale, 20

Recommendations, 144

Reliability, 77

inter-observer reliability, 77

internal consistency, 77

test-retest reliability, 77

Replication, 60

Research, 3

aims, 4-6

types, 6

Research Design, 59-60

definition, 59

principles, 60-62

types, 62-66, 71-73

Research Methodology, 102-105

equipment and other tools, 103

procedure, 103

research workbook, 104-105
subjects or participants section, 103
things to remember in presenting a
methodology, 104

Research Question, 32
formulating, 33

Research Title, 31, 141

Research Topic, 28-30
factors to be considered, 29
sources of research ideas, 29

Results and Discussion, 143

Review of Related Literature, 46, 142
ethical standards in writing, 50
organizing and summarizing information, 47-48
selection of a relevant study, 45
synthesizing information, 48
writing, 48-49

S

Sampling, 67
methods, 67-70
non-probability sample, 67
population, 67
probability sample, 67
subjects, 67

Scientific Method, 27, 28

Scope and Delimitation, 36-37, 142

Secondary Data, 114

Significance of the Study, 37, 142

Simple Random Sampling, 67
lottery sampling, 68
systematic sampling, 69
use of a table of random numbers, 68

Single-subject Designs, 66
baseline design, 66
discrete trials design, 66

Statement of the Problem, 35, 142

Stratified Random Sampling, 69

Summary and Conclusions, 143

T

Time-Series Design, 73

Technology, 6

Theoretical Framework, 51, 55

U

Ungrouped frequency distribution, 87

V

Validity, 78-79
concurrent, 79
content and face, 78
construct, 78-79
predictive, 78

Variables, 17
continuous, 19
dependent, 18
discrete, 19
extraneous, 19
independent, 18, 63
measurement levels, 19-20
types, 18-19

W

Works Cited, 138, 144

Writing a Research Report, 138-140
