Great Books Publishing
2014

CONTENTS

PREFACE	iii
ACKNOWLEDGMENT	v
PART I. THE RESEARCH PROCESS	1
Chapter I -SCIENCE AND HUMAN INQUIRY	1
The Modes of Human Inquiry	1
The Four Methods of Knowing and Believing	2
Conflicts in the Search for Knowledge:	
The Galileo Story	4
Science and the Scientific Approach	5
Assumptions of Science	6
Science and Technology; Research and Development	7
The Meaning and Characteristics of Research	9
The Research Process	9
Characteristics of Research	11
The Inductive and Deductive Nature of Research	12
Chapter II -RESEARCH ETHICS	13
Characteristics of a Researcher	13
Components of Ethics in Research	14
Chapter III-FORMULATING A RESEARCH PROBLEM	20
The Research Problem and Its Characteristics	20
Criteria for Choosing a Good Research Topic	23
Sources of Research Problem	24
Formulating Research Hypothesis	25
Variable, Its Meaning and Kinds	28
Formulating the Research Title	30
Defining Variables in Research	31

Chapter IV - THE REVIEW OF RELATED LITERATURE	32
The Need for Related Literature	32
How to Search for Related Literature	32
Chapter V - RESEARCH METHODOLOGY	35
The Importance of Methodology	35
Classifications of Research	37
According to Level or Purpose	37
According to Scope	39
According to Methodology	41
1. Historical Research	41
Characteristics of Historical Research	42
Steps in Historical Research	43
Difficulties in Historical Research	45
2. Descriptive Research	46
Case Studies	46
Surveys	47
Longitudinal Studies	47
Documentary Analysis	48
Correlation Studies	48
Evaluation Research and Assessment Studies	49
Anthropological or Ethnographic Studies	49
3. Experimental Research	50
Characteristics of Experimental Research	50
Experimental vs. Correlation Research	52
Control of Extraneous Variables in Social Research	53
Experimental Designs	54
4. Action Research	55
Characteristics of Action Research	55
Sample Topics for Action Research	56
Format and Parts of Action Research	56
Steps in Action Research	56
Validity in Research	57
Threats to Internal Validity	57

Chapter VI - GATHERING RESEARCH DATA	58
Sampling, Its Rationale and Meaning	59
Reasons for Sampling	59
Determining Sample Size	60
Sampling Methods	60
Data-Collection Methods and Tools	65
1. Questionnaire	65
Questionnaire Construction	65
The Cover Letter	67
2. Interview	67
Advantages of Interview Method	67
Types of Interview According to Style	68
Some Rules in Interviewing	68
Tips on Interviewing	70
Difference Between Interview Schedule and Interview Guide	72
3. Observation	72
Types of Observation	73
Strengths of Participatory Techniques	74
4. Documentary Analysis	75
5. Participatory Rapid Rural Appraisal	75
6. The Use of Tests in Collecting Research Data	76
Kinds of Tests	77
 Chapter VII - STATISTICAL ANALYSIS OF RESEARCH DATA	 81
Some Statistical Symbols	82
Identifying Appropriate Statistical Tools	82
Considerations in the Choice of Statistical Tools	82
A. Descriptive Statistical Tools	83
1. Measures of Central Tendency	83
2. Measures of Variability	86

B. Inferential Statistical Tools	90
Hypothesis Testing	90
One-Tailed and Two-Tailed Tests	90
Levels of Statistical Significance	92
1. Single Sample Case	92
2. Two Related Samples Case	96
3. Two Independent Samples	102
4. k-sample Case	105
5. Measures of Relationship	114
PART II. RESEARCH WRITING	118
Chapter VIII - HOW TO WRITE RESEARCH RESULTS	118
Interpretation of Research Findings	118
Caution Against Errors in Interpretation	119
Caution Against Spurious Interpretation	119
Determining Cause and Effect Relationship	119
Caution Against Ecological Fallacy	120
Serendipity in Research	121
Drawing Conclusions in Research	127
Formulating Recommendations	128
Formats of Research Write-Up	128
BIBLIOGRAPHY	137
APPENDICES	140
Appendix A-1: DA-BAR Capsule Proposal Format	140
Appendix A-2: DOST Form No. 1A (Capsule R & D Program Proposal Summary Sheet)	146
Appendix A-3: DOST Form No.1B (Capsule R & D Proposal)	148
Appendix B-1: Critical Values of the Chi-Square Distribution	151

RESEARCH METHODS AND TECHNIQUES

Appendix B-2: Critical Values of the t-Distribution	152
Appendix B-3: F-Distribution Table	154
Appendix B-4: Critical Values for the Friedman Two- Way Analysis of Variance by Ranks, Fr	156
Appendix B-5: Table of Random Numbers	157
Appendix C-1 Sample Request Letter for Data Collection	163
Appendix C-2 Sample Cover Letter for Questionnaire	164
INDEX	165

INDEX

- A**
Achievement or summative test, 78
Action research, 55;
 characteristics, 55; format and parts, 56; steps, 56
AFNR Researches, 38
Alfred Nobel, 123
Alternative hypothesis, 26
Analysis of Variance, 106
Analysis of data, 134
Analytical, as characteristics of research, 11
ANOVA Table, 107
Anthropological or ethnographic research, 49
Applied research, 37
Aptitude test, 78
Argumentum ad populum, 3
Argumentum ad verecundiam, 3
Assessment study, 49
Assumptions of science, 6
Attainable, research objective, 21
Authoritarian mode of human inquiry, 2
Authority as method of knowing, 3
- B**
Background of the study, 129
Basic research, 37
Before-After Two-Group Design, 54
Before-After Designs of Research, 98
Bioelectricity, 124
Boyle's Law, 37
- C**
Case study, 46
Categorical variable, 29
Cause and effect relationship, 119
Characteristics of a researcher, 13
 Intellectual curiosity, 13
 Intellectual honesty, 13
 Prudence, 13
Chi-Square analysis, goodness-of-fit 102; for two independent samples, 102; for k-independent samples, 105
Christopher Columbus, 126
Classifications of research, 37;
 according to level or purpose, 37; according to scope, 39; according to methodology, 41

- Claudius Ptolemy, 16
 Closed type question, 66
 Cluster sampling, 64
 Cohort study, 48
 Collection of data, 133
 Components of ethics in research, 14
 Conceptual definition of variable, 31
 Conceptual framework, 131
 Conclusions, drawing conclusions, 127
 Constant, 28
 Continuous variable, 29
 Coronary catheterization, 124
 Correlation study, 49
 Courtesy, 18
 Cover letter for questionnaire, 67
 Criteria for a good research problem or topic, 23
 Critical, as characteristics of research, 11
 Criticism of collected data, 44, external criticism, 44, internal criticism, 45
 Cross-sectional study, 47
 Cyclical, as characteristics of research, 11
 Cyril Burt, 16
- D**
 Data analysis, 134
 Data collection methods and tools, 65
 Dependent variable, 28
 Descriptive research, 46
 Descriptive statistical tools, 83
 Developmental Research, 8, 38
 Dichotomy, 29
 Discussion of findings, 134
 Documentary analysis (see content analysis), 48, 75
 Downstream research, 38
 Drawing conclusions, 127
 Dry run of questionnaire, 66
 Dynamic view of science, 5
- E**
 Ecological fallacy, caution, 120
 Electromagnetism, 125
 Elias A.K. Alsabti, 16
 Empirical, as characteristics of research, 11
 Errors in interpretation, caution, 119
 Ethics in Research, 14
 Ethnographic research, 49
 Evaluation research and assessment studies, 49
 Expected frequency, 104
 Experimental designs, 54
 Experimental group, 53
 Experimental research, 50; characteristics, 50
 Experimental research vs. correlation research, 52

- External criticism of data, 44
 Extraneous variable, 29; control of, 53
- F**
 F-F theory, 9
 Factorial design, 55
 Formats of research write-up, 128
 Formulating recommendations, 128
 Fraud and misconduct in research, 14-15; changing / falsifying data, 15; data cooking, 15; data trimming, 15; fabricating data, 15; plagiarism, 15
 F-test, 106
 Friedman Two-Way ANOVA by ranks, 110
- G**
 Galileo story, 4
 Gregor Mendel, 16
- H**
 Helium, 123
 High temperature superconductivity, 126
 Hipparchus of Rhodes, 16
 Historical research, 41; uses, 42; characteristics, 42; steps 43; criticism of data, 44; difficulties, 45
 Historiography, 41
 Human inquiry modes, 1
- Hypothesis, 25; formulation, 24; testing 86; one-tailed test, 86; two-tailed test, 87
- I**
 I-dopa, 124
 Independent variable, 28
 Inductive and deductive nature of research, 12
 Inferential statistical tools, 90
 Infra-red radiation, 125
 Inkjet printers, 126
 Intellectual creativity, researcher's characteristic, 13
 Intellectual curiosity, 13
 Intellectual honesty, 13
 Intelligence test, 77
 Interferon, 124
 Internal criticism of historical data, 45
 International Crop Research Institute for the Semi-Arid Tropics (ICRISAT), 30
 Interpretation of research findings, 118; caution, 119
 Interview, 67; advantages, 67; types, 73; formal and informal, 68; rules, 68; tips, 70; recording, 71
 Interview guide, 72
 Interview schedule, 72
 Introduction, 128
 Intuition, as a method of knowing, 3
 Iodine, 123

- J**
John Darsee, 17
- K**
k-samples, 105
- L**
Level of significance, 82, 91
Levels of research, 37; level 1, 37; level 2, 37; level 3, 38
Logical, as characteristic of research, 11
Locale of the study, 133
Longitudinal study, 47
Lottery technique, 61
LSD, 122
- M**
MacNemar Change test, 96
Measures of central tendency, 83; mean, 83, 89; median, 84, 89; mode, 86, 90
Measures of variability, 86; range, 86; variance, 87, 88, 90; standard deviation, 82, 88, 90
Measures of relationship, 114
Median, 84; properties, 86
Mendel, Gregor, 16
Methodical, as characteristics of research, 11
Methodology of research, 133; importance, 35
Methods of knowing and believing, 2; by tenacity, 2; by authority, 3; by intuition, 3; by science, 4
Microwave oven, 126
Midstream research, 38
Minoxidil, 123
Mode, 86
Modes of human inquiry, 1; authoritarian mode, 1; mystical mode, 2; rationalistic mode, 2
Moon Charon, 125
Multiple response question, 66
Multi-stage sampling, 64
Mystical mode of human inquiry, 2
- N**
Null Hypothesis, 26
- O**
Objectives of the study, 56
Objective tests, 77; kinds, 77
Observation methods, 72; types, 73; full observer, 73; observer as participant, 73; participant as observer, 73
Observed frequency, 104
One Group Pre-test Post-test Design, 54
One-spot Case Study, 54
One-Way ANOVA, 106
Open-ended questions, 66
Operational definition of variables, 31, 132

- P**
- Panel study, 47
 - Participative Rapid Rural Appraisal, 76, characteristics, 76, limitations, 76
 - Participatory action research, 76
 - Pearson Product-Moment Correlation Coefficient, 114
 - Penicillin, 122
 - Personality test, 78
 - Philippine Rice Research Institute, 30
 - Pilot testing, 38
 - Pitldown man, 15
 - Plagiarism, 15
 - Polytomy, 29
 - Post-test Only Control Group Design, 54
 - Power of generalization, 53
 - Pre-test Post-test Control Group Design, 54
 - Pre-test of questionnaire, 66
 - Primary sources of historical data, 43
 - Program, 39
 - Project, 39
 - Projective tests, 80, classifications, 80
 - Ptolemy, 16
 - Pure research, 37
- Q**
- Qualitative variable, 29
 - Quantitative variable, 29
 - Questionnaire, 65; advantages, 65; construction, 65; pre-test, 66; cover letter, 67
- R**
- R and D funding organizations, 25
 - Radioactivity, 125
 - Randomized two-Group Design, 54
 - Range, 86; properties, 86
 - Rationalistic mode of human inquiry, 2
 - Recommendations, 135
 - Refereeing of research, 12
 - Replicable, as characteristics of research, 11
 - Replication of research, 11
 - Research according to level, 37
 - Research according to scope, 39; program, project, study, 39
 - Research and Development, 7
 - Research design, 133
 - Research ethics, 13
 - Research hypothesis, kinds, formulation, 25, 131
 - Research instruments, 133
 - Research, meaning, 9; characteristics, 11; research process, 9; inductive and deductive nature, 12; classifications, 37

- Research methodology, 35,
133
- Research problem formulation,
20; sources, 24
- Research process, 9
- Research title formulation, 30
- Research topic, criteria in
selection, 23
- Respect for human rights, 18
- Respondents and sampling
procedures, 133
- Retin A, 124
- Review of related literature, 32,
128; how to review
related literature, 33, 128
- Robert Slutsky, 17
- S**
- Safety glass, 126
- Sample size, determination, 60,
89, 104
- Sampling, 59, reasons for
sampling, 59
- Respondents and sampling
procedure, 133
- Sampling Methods, 60
- Simple random sampling,
61;
Lottery technique, 61;
- Table of random
numbers, 61;
- Random number
generator, 61;
- Systematic sampling, 62;
- Stratified sampling, 62;
Cluster sampling, 64;
- Multi-stage sampling, 6
- Saran, 123
- Science and Technology,
Scheffer C.G. Tseng, 18
- Science, 5; static view, 6;
dynamic view, 5; aim,
assumptions, 6; as a mode
of knowing, 4
- Scientific approach, 5
- Scope and delimitation of
study, 130
- SEAMEO-SEARCA, 25
- Secondary sources of historical
data, 44
- Serendipity in research, 1
- Significance of the study,
Single sample case, 92
- Sloven's formula, 60
- SMART, 21
- Solomon Four-Group
Design, 55
- Sources of research
problem, 24
- Spurious interpretation of
relationship, caution, 1
- Standard deviation, 88;
properties, 88
- Statements of the
problem, 129
- Static group comparison, 5
- Static view of science, 5
- Statistical significance
levels, 92
- Statistical symbols, 82
- Statistical test, considerations
in choosing, 78

Statistical tools identification,
82, descriptive, 83
Stratified sampling, 62
Study, as kind of research
according to scope, 39
Subjective tests, 79
Summary, conclusions and
recommendation, 135
Summary of findings, 135
Survey, 47; census survey, 47;
sample survey, 47
Systematic sampling, 62

T

Technology generation and
commercialization, 38
Test as a method of collecting
data, 75
Theoretical framework, 131
Trade test, 79
Trend study, 47
Truthfulness, 14
t-test, for single population,
94; for two related samples,
96 ;for two independent
samples, 102
Two Independent
Samples, 102
Two related samples, 96

U

Units of analysis
in research, 118
Urea, 123

V

Validity in research, 57; threats
to internal validity, 57
Variables, meaning and
kinds, 28
Active and attribute
variables, 29
Continuous and categorical
variables, 30
Dichotomy and
polytomy, 29
Discrete and continuous
variables, 29
Extraneous variable, 29
Independent and dependent
variables, 28, 52
Quantitative and qualitative
variables, 29
Defining variables in
research, 31, 130
Variance, 87; properties, 88
Viagra, 123
Vulcanization of rubber, 126

W

Wave particle duality, 125

X

x-rays, 125
