*Abstract*

This descriptive study aimed to determine the effect of romantic relationship on the studies, family relationship and relationship to friends among the 200 BSCSM students of JBLFMU for academic year 2008-2009. This study used a researcher-made questionnaire - checklist: the demographic profile of the respondents in part I and the questionnaire - checklist in part II. The questionnaire - checklist consisted of questions on the romantic relationship its effects on the students' studies, family relationship, and relationship to friends. The statistical tools used were frequency count, percentage and rank. Results revealed that whether the respondents were grouped according to age, sex and place of residence, they perceived that they were inspired to go to school, they were encouraged to be strong
