A

Abbreviations:

ANSI, a2

electronic diagrams, 624

for use on drawings/in text (ANSI),
a21-a24

Acceleration, plotters, 22

Accumulation of tolerances, 335

Accuracy:

dimensional, 283-84

of drawing, 40, 53-54

of working drawings, 417

Acme thread, 363, 374

detailed representation of, 371

general purpose, a46

Actual size, 331

Adaptive control (AC), 287

Addendum, 609

Addendum angle, 609

Adhesives, 276

Adjacent areas, 161-62

Adjacent views, 134

Adjustable curves, 63-64

Adjustable triangles, 47

Aerial perspective, 10

Aerial photogrammetry, 664

Aeronautical maps, 664

Alberti, 4

Aligned sections, 158, 212-13

Aligned system, 300

Alignment of views, 141-42

Alligator metal connector, 644

Allowance, 330-31

Alloys, 279

amorphous, 279

general manufacturing
characteristics of, 280

low-melting, 279

shape-memory, 279

superalloys, 279

Alphabet of ink lines, 62

Alphabet of lines, 43-44

Alternate four-center ellipses, 507

Alternate positions of views, 156

Aluminum, 67

America Online (AOL), 490

American bond brick, 656

Engineers, 6America's Cup, and high technology,
540-41

Amorphous alloys, 279

Ampere, 293

Analog computers, 14

Angle of thread, 363

Angles, 84, 166-67

bisecting, 87

dimensioning, 301

drafting, 47

in isometric projections, 502-3

laying out, 91-92

chord method, 92

sine method, 92

tangent method, 91-92

in oblique projections, 538

pressure, 600

of receding lines, 532-34

tolerances of, 333

transferring, 87

Angular perspective, 554

drawing, 551-53

Angular tolerance zone, 346

Angular tolerances, 333

Angularity tolerance, 349

ANSI. *See* American National

Standards Institute (ANSI)

Application programs, 13-14, 15

Approximate dimetric drawing,
513-14

Approximate ellipse, drawing, 107-8

Approximate four-center ellipse,
505-8

Archimedes, 361

spiral of, 111

Architects' scale, 48, 49, 51, 51-53

- Architects' triangular scale, 39
 Architectural design, 16
 Architectural terra cotta, 654, 656
 Arcs, 85, 98–102
 circular:
 bisecting, 87
 rectifying, 102
 dimensioning, 301–2
 drawing a series of tangent arcs
 conforming to a curve, 101
 drawing tangent to a line or arc and
 through a point, 98
 drawing tangent to an arc and a
 straight line, 99
 drawing tangent to two arcs, 99–100
 drawing tangent to two arcs and
 enclosing one or both, 100–101
 drawing tangent to two line at acute
 or obtuse angles, 99
 drawing tangent to two lines at right
 angles, 98–99
 rectifying, 102
 setting off a given length along a
 given arc, 102
 sketching, 71, 124, 124–25
 welding, 691
 Arcs in isometric, 508
 ARMA (American Records
 Management Association), 489
 Arrow side of a joint, 693
 Arrowheads, 295–96
 Art to part, 7–8
 getting new products to market
 quickly, 8
 intelligent models, 7
 optimizing the design, 7–8
 rapid prototyping, 8
 single database, 7
 sketching freedom, 7
 Artgum cleaning eraser, 39
 Artificial intelligence (AI), 290
 Artistic drawings, 3
 Ashlar (ashler), 656
 Aspen Technology, 289
 Assembly drawings, 410, 418–22
 assembly sectioning, 422
 check assemblies, 423
 dimensions, 419
 general assemblies, 418–22
 hidden lines in, 419
 identification, 419–22
 installation assemblies, 423
 outline assembly, 423
 revisions, 422
 sections, 418
 subassembly, 423
 views, 418
 working drawing assembly, 422
 Assembly, modeling for, 277–79
 AT&T WorldNet, 490
 AutoCAD 2000, 305
 using to create “XYZ” space, 205
 AutoCAD Mechanical Desktop
 software, 140, 612–13
 Automanager Workflow®, 489
 Automated handling of materials, 287
 Automatic mechanical pencils, 39, 69
 Auxiliary plane, 230
 Auxiliary sections, 238–39
 Auxiliary views, 229–54
 auxiliary plane, 230
 auxiliary sections, 238–39
 auxiliary-view method, 238–39
 classification of, 232–34
 depth auxiliary views, 232–34
 height auxiliary views, 234
 width auxiliary views, 234
 computer graphics, 243–44
 datum plane, 231–32
 defined, 230
 dihedral angles, 235–36
 drawing, 231
 folding-line method, 231
 reference-plane method, 232
 half, 238
 hidden lines in, 238
 partial, 237–38
 plotted curves, 236
 primary auxiliary view, 230, 240
 reference planes, 231–32
 reverse construction, 237
 revolving a drawing, 234–35
 secondary auxiliary view, 230
 oblique direction of sight given, 242
 successive, 240
 third auxiliary views, 240
 true size of an oblique surface
 folding-line method, 240–41
 reference-plane method, 241–42
 uses of, 240
 Axes, 497
 Axis:
 inclined, 259–60
 normal, 259
 oblique, 259–60
 Axis of revolution, 256
 Axis of screw, 363
 Axonometric axes, 497
 Axonometric projection, 10, 69–70,
 122, 495–529
 defined, 495–96
 dimetric projection, 512–14
 approximate dimetric drawing,
 513–14
 defined, 512
 Instrumaster Dimetric Graph
 paper, 512
 steps in dimetric
 drawing/sketching, 513–14
 isometric projection, 242,
 497–514
 angles in isometric, 502–3
 approximate four-center ellipse,
 505–8
 arcs in isometric, 508
 box construction, 501
 center lines, 501
 curves in isometric, 503–4
 defined, 495–96
 ellipse templates, 508
 exploded assemblies, 511
 hidden lines, 501
 intersections, 508–9
 irregular objects, 503
 isometric axes, 498
 isometric dimensioning, 510–11
 isometric drawing, 498
 isometric planes, 498
 isometric scale, 498
 isometric sectioning, 509–10
 nonisometric lines, 498, 501–2
 oblique surfaces in isometric, 499
 piping diagrams, 511
 positions of the isometric axes,
 499–500
 screw threads in isometric, 508
 spheres in isometric, 509
 true ellipses in isometric, 504–5
 by method of intersections, 518–20
 offset measurements, 498, 500
 piping drawings, 683–85
 trimetric projection, 242, 515–20
 defined, 515
 trimetric ellipses, 515
 trimetric scales, 515–18
 types of, 496–97
