*Abstract*

This descriptive study, conducted last October 2007, aimed at determining the level of study habit of the tourism students of John B. Lacson Foundation Maritime University concurrently with their night life activity. It also aimed at determining if there was significant relationship in the level of study habit and night life activity among respondents when classified as to their year level. The respondents were the 60 randomly selected tourism students of John B. Lacson Foundation Maritime University. A researcher-made questionnaire was used to determine the study habit and the night life activity of the respondents. The result of the study shows that there is a significant relationship that exists between the study habits and the night life activity of BS Tourism student when classified according to their year level.
