Abstract

The study was undertaken to determine the use of Wi-Fi connection among students of JBLFMU-Molo, Inc., for the first semester of School Year 2009-2010. The participants of the study were 300 students of College of Business and 300 students of College of Marine Engineering. The data of the study were obtained through the use of a questionnaire checklist. Frequency count, percentage and rank were employed in descriptive data analysis. Result shows that 87.33% or majority of the students of JBLFMU-Molo, Inc., were aware of the Wi-Fi connection. However, the study revealed that only 54.00% of the students are using the Wi-Fi connection.
